Air Monitor Corporation is Open For Business

To our Valued Customers, Representatives, and Suppliers,

A quick Air Monitor operations update amid COVID-19.

First and foremost, thank you for your continual loyalty and trust in Air Monitor throughout this unprecedented pandemic. We understand the critical role Air Monitor plays in your business, and we are here for you. As an essential business, Air Monitor continues to remain open and operate at full capacity. We are committed to delivering the flow meters you depend on for your process and facility operation. We will continue to provide the same excellent level of support and customer service you expect from Air Monitor.

Some commercial product lines have been affected by material supply chain shortages and may affect delivery times. **No need to call in - any customers that may be affected by this shortage are being contacted and notified by our team.**

The majority of Air Monitor products are shipping within our standard lead time. For those needing expedited shipments, most products are available for expedited delivery. Contact Air Monitor Sales for best delivery times. If you have questions regarding availability, give us a call at (800) AIRFLOW or (707) 544-2706. Our flow and application expert engineers remain on the job to help you with your flow application needs.

Of course, our top priority is the safety and well-being of our employees, customers, partners, and families. We continue to vigilantly operate under the guidelines of the CDC and our local regulations. We have implemented best practices such as visitor restrictions, work from home policies where possible, social distancing, and encourage recommended self-hygiene habits.

How We are Helping-Partnering with the Medical and Pharmaceutical Industry to Fight COVID-19

Did you know that Air Monitor provides critical instrumentation for room or space pressurization used to create clean rooms? Clean rooms use positive air pressurization of spaces to avoid the introduction of contaminants into controlled environments. Hospitals and pill manufacturers rely on Air Monitor's engineered solutions to deliver optimal results.

We will keep you posted on any developments. For now, take care and stay safe. We know we will get through this together.

Sincerely,

Scott Harrison
General Manager
Air Monitor Corporation
